

Know Your College

Team

Hrithik

Abhishek shah

Medhir Manoj

Web Development

Overview

The purpose of this website is to provide a better way of finding the information about a particular college of Delhi University. Also students can easily look for the cutoff of a college instead of looking it in a 20-30 pages long list

Details

A basic idea for making this website is that as we all are from jee background ,during preparation we always try to find out the cutoff of this iit ,nit from several websites in a categorised manner!!

So during this year one of the members Abhishek suggested the idea that he is finding the best college for her sister in Delhi University but on a web not a single website that can help in deciding whether this college can be got by these marks or not !!

And also if you ever notice the Du cutoff 15-20 page 91 colleges(Columns) 50course(Row) ,i am damn sure you can't find the college

So we try to make this website so that student can easily got the idea of cutoff course fees ranking of their favorite college

Specifications

1. This website can help students to find the cutoff of du !! in catgeriosed manner like college wise , round wise category wise !!
2. Also help to find out the course on particular college ,fees per course
3. Help to find out the best college on the basis of nirf data

Team Goals

We work in team as this website is backend supported so

1. Abhishek have little bit knowledge of website so i take care of backend part by using **nodejs and use the database --mongodb** and make the schema so can be render the data through backend

For frontend

Hrithik and medhir make the ui , we try to make ui user friendly user attractive so can they can easily attach with that website

By Using

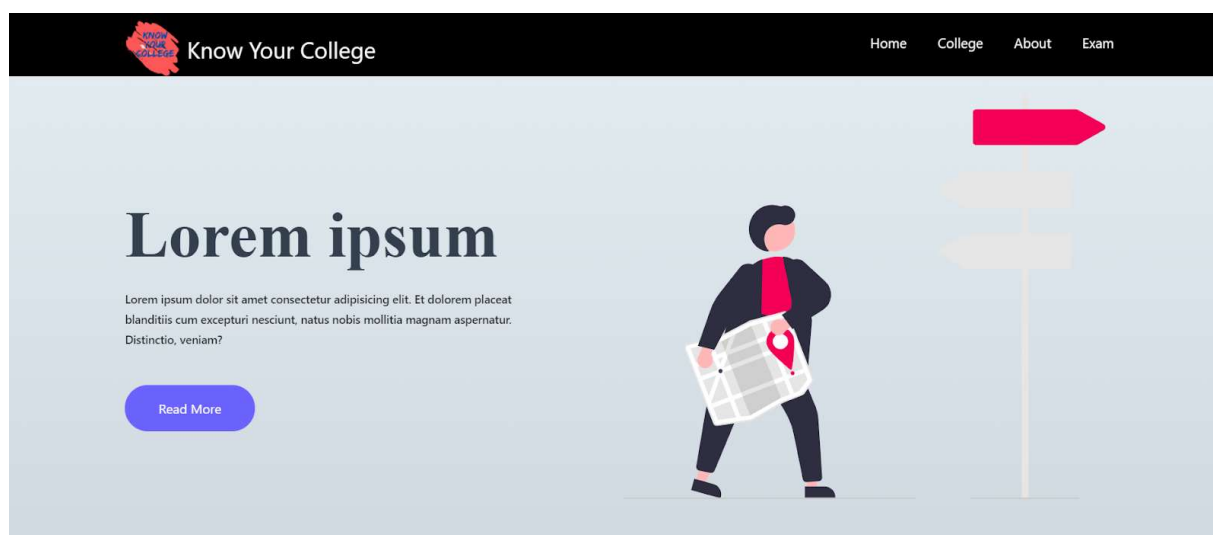

1 Redux (used for state management)

2 Bootstrap React

3 Segment react ui

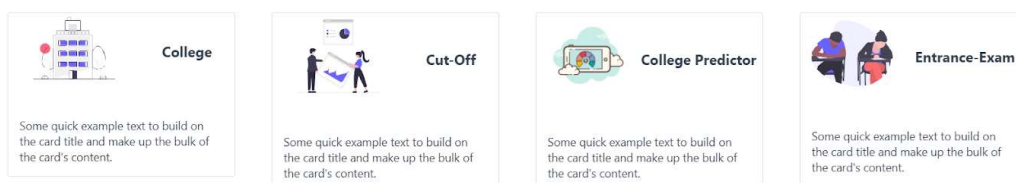

4 React (used as a ui framework)
