

QuestionX

Student Name: Sukhpreet Singh
Mentor Name: Harsh Bardhan Mishra
Demo link : QuestionX
Repo Link : Github

Project Description

QuestionX web app is used to create a useful application which will take a Pdf file from user and generate MCQs from the provided Pdf. This application was usually made for teachers. This will reduce the efforts of reading the whole file and then searching for questions and answers related to those questions. We used Machine learning and web development integration to get the required application.

Tech

- HTML
- CSS
- Flask
- React
- Bert Summarizer
- Wordnet
- Conceptnet

Status

Status of this project is under process. we have made the design and had learned about React,Flask and other techs and soon going to complete this project.

Experience

I have learned many things from this project. I have worked on React and learned many new things about it. I have worked and learned about flask also and had made few basic things with it,currently i am learning NLP concepts to make more contribution and complete this project. I have learned to integrate two techs i.e. Machine learning and Web development.
