MY PORTFOLIO

(*Personal website providing professional information about an individual*)

TEAM MEMBERS:

- *MENTEE* **:** *JATIN VERMA*

- *MENTOR* **:** *MOHIT RAJ*

DESCRIPTION :

My Portfolio is a beginner friendly project. It describes about various details of a person like his/her personal details about how to reach out to him/her through conventional ways. It gives a brief description of the person. It also consists of short description of previous work/projects done by the person. It also tells about the user's past work experiences with proper verification. It also contains portal which can help others to connect to him for work related stuff. At last but not the least it contains links to user's social media accounts which makes it easier for others to follow him/her or reach out to him.

MY CONTRIBUTION :

Added Navigation bar, Home page, About me page, Project section page, Experience section, Contact us page.

MY EXPERIENCE :

I learned a lot many things for this project. Considering that this is my first web development project I am quite satisfied with my project. I learned a lot about how to make front-end projects using **HTML** and **CSS** and how to solve issues which I encountered during this project. It also taught me how to work with others as I faced

many merge conflicts but our mentor helped us through and through. Moreover this is my first Open Source Contribution which makes me feel amazing as I always wished to contribute in Open Source. I also got to know about some very useful stuff like hosting a website, and it was a great experience doing that.
